

### **Actions, Proposals and an Intervention**

an exhibition by Ramiro Guerreiro

10 July to 2 August 2009

In this exhibition, Ramiro Guerreiro presents drawings, photographs, video and an installation resulting from his most recent "visual research" in two areas of the city with different spatial and experiential characteristics - the Baixa and Alta de Lisboa -, revealing their unique universe through mapping and interaction with and in these areas. The specific starting point for this exhibition of new works is the Lumiar Cité gallery and it aims to establish a link between the two areas referred to above through a record of actions, focusing his interest on their unique features and discussing them in a refined manner, avoiding the more obvious aspects. "Actions, Proposals and an Intervention" is the latest exhibition in the project for this space, designed and produced by Escola de Artes Visuais Maumaus.
